

First Sustainability Report of VakıfBank has been published

VakıfBank released its first Sustainability Report which includes its performance in the field of sustainability with the products and services designed by considering the environmental and social factors.

VakıfBank, being the only public bank in BIST Sustainability Index since the beginning of the index which was launched in 2014, published its first Sustainability Report. Covering the year of 2014 and the first six months of 2015, the report is prepared in accordance with the latest G4 version of the Sustainability Reporting Guidelines developed by Global Reporting Initiative (GRI) which is widely accepted throughout the world.

Creating value with sustainable development

Expressing the pleasure of sharing the Sustainability Report with the public, VakıfBank's CEO Mr. Halil Aydoğan stated "Being one of the concrete steps that we have taken in the last two years, this report reveals our sensitive and responsible practices towards all shareholders, environment and the society. We continue to contribute to the sustainable development by considering the environmental and social factors more during this process with dynamics of composing a responsible and conscious society through the foundation culture carried from past to the present."

Organizational Structure of Sustainability

Indicating that the organizational structure of sustainability was formed in 2015 by taking another significant step to manage the sustainability practices efficiently, CEO Mr. Aydoğan stated "We integrate the sustainability approach to all banking operations and processes. We will continue to add value to VakıfBank's corporate identity and the society with the new organizational structure."

Support to the Sustainable Energy Finance

Emphasizing the great support of finance for the renewable and sustainable energy projects, Mr. Aydoğan continued his speech "As one of the leading banks in sustainable energy finance, VakıfBank both provides funding sources to our country with the loan agreements signed with the international financial institutions and encourages the companies to the more environmental technologies."

We build a better future for the generation of today and tomorrow

VakıfBank's CEO Mr. Aydoğan finalized his speech "As today, VakıfBank will continue to work for the sustainable development in accordance with the expectations of our shareholders in the upcoming periods, too."
